ABSTRACT

The target population of this research is the entire structural officers in 11 regencies/cities of Riau Province. Accessible population is entire structural officers in 4 technical boards, which is Regional Income Board Development Board (Dipenda). regional (Bappeda), Infrastructure and Settlement Board (Kimpraswill) and Regional Secretary stratified random sampling, total sampling is 140, out of135 .Applvina returned questionnaires, 124 is good for the purpose of analysis. Structrual Equation Modelling (SEM) with AMOS software 6 version is used to examine the relationship among variables. Based on data analysis it is found intentional budgetary slack conducted by regional government in di 11 regencies/cities of Riau Province. The finding is also supported by sistematic variance of financial statement of each respective regencies/cities. Several results also generate; first, personality does not influence budgetary slack. Personality of decision makers represenative in the form of budget particiaptory to influence budgetary slack. This research has several limitation as it is only conducted in regencies/cities of Riau Province as executive board located in 11 budget planners. In fact, budget decision also involves regional house of representative or Dewan Perwakilan Rakyat Daerah (DPRD) of Riau regencies/cities as agency that verify and control budgettting process.

Keywords: personality, budget participatory, and budgetary slack
